● FU1015 : FRESH-UP High absorbent food pad

● FU1015 : FRESH-UP Eco-friendly absorbent food pad

Food absorbent pad is the best option to maintain food fresh. No matter the what kind of food it is; Pork, beef, poultry, fish or vegetables. The core of the pad consists of super-absorbent polymer, 100% natural pulp and tissue. Between the top and bottom of the pad is plenty of space for precipitates which are absorbed. The pad absorbs only precipitate and preserves juices within foods. For the pad touches foods directly, the pad is heat-sealed. No adhesive used during the manufacturing process.

FU-1015

WD-0913

The most popular model among our products. Between the top and bottom of the pad is plenty of space for precipitates which are absorbed. The pad absorbs only precipitate and preserves juices within foods. For the pad touches foods directly, the pad is heat-sealed. No adhesive used during the manufacturing process.

Item	Size (mm)	Spec					Absorbention cc/pcs
		Top	Core			Bottom	
FU-1015	100X150	Film	Pulp	SAP	Tissue	Felt	90
WD-0913	90X130	Film	Pulp	SAP	Tissue	Felt	70

Meat Paper : White

Used for processing food, cleansing appliances and getting rid of drips. Also can substitute paper towels when thawing tuna. MEAT paper is disposable, so it's free from sanitary matters due to repetitive use. By combination of PP and pulp, MEAT paper shows higher tension and makes no by-products of friction.

- material : hydroknit
- size : 365×400mm per piece
- length : 80m (200pcs)
- color : white

Meat Paper : Pink

The most general model for displaying foods. It absorbs blood came out from the foods and minimalizes visual displeasure. MEAT paper: Pink prevents foods from propagation of germs and being spoiled. Designing the model, we attempted gorgeous image with comb-pattern, usability with perforated lines spaced about 40cm.
